SUMMARY

Data Science and Business Analytics postgraduate with hands-on experience in building machine learning models for real-world problems including classification, regression, anomaly detection, and time-series analysis. Proficient in Python (Pandas, NumPy, Scikit-learn) with foundational exposure to PyTorch and large-scale data processing.

Experienced in end-to-end model development—from data preprocessing and feature engineering to evaluation using metrics such as ROC-AUC and F1-score—along with a solid understanding of ML lifecycle concepts, model monitoring, and pipeline design.

Strong problem-solving mindset with the ability to translate data into actionable insights, and actively building skills in ML engineering and scalable systems.

SKILLS

Machine Learning Classification, Regression, Ensemble Models, Anomaly Detection, Time-Series

Programming Python (Pandas, NumPy, Scikit-learn) Python (Pandas, Scikit-learn)

Deep Learning PyTorch (basics), LSTM, Autoencoders

ML Systems Model lifecycle, pipeline design, monitoring concepts

Big Data PySpark (basic), large-scale data handling

Visualization Tableau

Languages English, Tamil, Hindi

CERTIFICATIONS

OCI 2025 Certified Data Science Professional, Oracle **OCI 2025 Certified Gen AI Professional**, Oracle **OCI 2025 Certified AI Foundations Associate**, Oracle

5 Day AI Agents Intensive Workshop, Google

Introduction to Python, DataCamp

Data Storytelling Track, DataCamp

Introduction to SQL, DataCamp

Mckinsey Forward Learner, Mckinsey

EDUCATION

PGP in Data Science & Business Analytics, Great Lakes Executive Learning & The University of Texas Jul '25 — Jul '26
at Austin, McCombs School of Business (GPA: 8.85 / 10)

MBA in Finance & HR in Finance & HR, M.O.P Vaishnav College for Women, University of Madras
Apr '21 — Apr '23
(GPA: 7.79 / 10)

B.COM in General in General, C.T.T.E College for Women, University of Madras (GPA: 8.42 / 10) Nov '18 — Jul '21

Higher Secondary in Commerce with Business Math, Kaligi Montford
May '16 — May '17
(GPA: 9.05 / 10)

Secondary School in CBSE, Vivekananda Vidyalaya (GPA: 9.05 / 10) May '14 — May '15

Prepared for SSC CGL Exam, Varanda Race Institute Aug '23 — May '26

EXPERIENCE

Risk Dashboard Developer Intern

Jan '26 — Present

Remote Zetheta Algorithms Pvt Ltd

Worked on quantitative finance projects including Systemic Risk Network, Quantitative Risk Dashboard, Fear-Greed

Meter, and Oil Shock Tracing.

- Designed core modules for risk analytics, market sentiment measurement, and shock propagation analysis, followed by visualization and dashboard integration
- Conducted testing, validation, and documentation to ensure reliability of financial risk indicators and analytical outputs.

Data Science Intern

Dec '25 — Jan '26

Remote EVOASTRA VENTURES PVT LTD

Performed ethical web scraping and data collection to build job-market datasets

- Cleaned, validated, and structured raw data using Python and Pandas
- Conducted EDA to identify hiring trends across roles, skills, and locations.

Data Analyst Intern

Aug '25 — Sep '25

Remote ElevateLabs-(Best

Completed 8 end-to-end data analytics projects using Excel, SQL, Python, and Power BI

- Conducted real-world case study using primary survey data, from questionnaire design to insight reporting
- Recognized as Best Performer for analytical quality and consistency.

AWARDS

3rd Place – Shinkansen Hackathon (Passenger Satisfaction Prediction) |

Great Learning

Secured Top 3 position in a 2-day Shinkansen Hackathon by building a machine learning model to predict passenger satisfaction using real-world travel data, achieving ~95.6% accuracy.

Research Paper Presentation - Impact of Virtual Influencers in Marketing|Ethiraj College for Women

2nd Place,Conducted research on the impact of virtual influencers on consumer engagement and brand perception, analyzing trends in digital marketing adoption and user interaction patterns, and presented data-driven insights to evaluate effectiveness of AI-driven marketing strategies.

PROJECTS

INN Hotels Booking Cancellation Prediction, University of Texas at Austin

- Developed a **classification model to predict booking cancellations**, achieving **ROC-AUC ~0.85 and F1 ~0.70**, using feature engineering, VIF-based selection, and threshold optimization
Identified key drivers (lead time, OTA bookings, customer intent signals) and translated insights into **revenue retention strategies**, improving decision-making for pricing and booking policies

Industrial ML – Smart Building Energy Optimization

- Built a **time-series anomaly detection system** using LSTM autoencoders and ensemble models on multivariate energy + weather data, improving anomaly detection robustness and enabling classification of usage patterns (Drop/Normal/Spike) for operational monitoring
Designed an end-to-end pipeline (data ingestion → preprocessing → modeling → evaluation), quantifying financial impact of anomalies and enabling **real-time energy optimization decisions**

Water Quality Prediction – EY Hackathon

- Developed a **multi-source ML pipeline** integrating satellite (Landsat) and climate data, using LightGBM/XGBoost with **5-fold cross-validation**, achieving **R² ~0.82** on environmental prediction tasks
Performed spatial-temporal feature engineering to improve generalization across unseen regions, delivering **near top-tier performance (~0.88 benchmark)** in a global hackathon

Oil Shock Market Simulation Platform (Ongoing)

- - Built a **simulation engine for oil price shocks**, modeling supply-demand disruptions, geopolitical events, and cross-asset impacts using time-series and correlation-based frameworks
 - Designed scenario-based analytics and portfolio response models to evaluate **volatility shifts, sector rotation, and macroeconomic risk propagation** across markets

ShowTime OTT – Viewership Prediction

- Developed regression models (OLS, Ridge, Lasso) to predict content viewership, achieving **R² ~0.78** and improving generalization via regularization techniques
Identified key engagement drivers (trailer views, seasonality, release timing), enabling **data-driven content strategy and marketing optimization**

AI-Powered Smart City Road Safety Intelligence System | IIT Madras Road Safety Hackathon 2026 (Ongoing)

- Developing an AI-driven urban accessibility and road safety platform using Python, Machine Learning, anomaly detection, governance analytics, emergency escalation workflows, and predictive risk intelligence to support smart-city traffic management and emergency accessibility monitoring.
