SUMMARY

AI/ML professional with hands-on experience in Machine Learning, Generative AI, and RAG-based applications using Python and SQL. Skilled in building ML pipelines, semantic retrieval systems, anomaly detection models, and AI-driven analytics solutions. Strong foundation in LLM workflows, vector search, and scalable AI applications with a focus on solving real-world business problems.

SKILLS Programming & Databases: Python, SQL

Machine Learning: Classification, Regression, Ensemble Models, Anomaly Detection, Time-Series Forecasting

Generative AI & LLMs: RAG Pipelines, LLM Applications, Prompt Engineering, Embeddings, Semantic Search, Vector Databases, AI Agents

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, PyTorch (Basics), LangChain, FAISS

Visualization & Tools: Tableau, Power BI, GitHub, Jupyter Notebook

Concepts: Feature Engineering, Model Evaluation, ML Pipelines, Retrieval Systems, AI Workflow Automation

Additional Exposure: FastAPI (Basics), REST APIs, ChromaDB, Prompt Evaluation, AI Agent Workflows, LLM Integration

Languages English, Tamil, Hindi

CERTIFICATIONS

OCI 2025 Certified Data Science Professional, Oracle OCI 2025 Certified Gen AI Professional & Oracle OCI 2025 Certified AI Foundations Associate

[5 Day AI Agents Intensive Workshop](#), Google

[Introduction to Python](#), DataCamp

[Data Storytelling Track](#), DataCamp

[Introduction to SQL](#), DataCamp

[Mckinsey Forward Learner](#), Mckinsey

EDUCATION

PGP-Data Science & Business Analytics , Great Lakes Executive Learning & The University of Texas at Austin, (GPA: 8.85 / 10)	Jul '25 — Jul'26
MBA in Finance & HR , M.O.P Vaishnav College for Women, University of Madras (GPA: 7.79 / 10)	Apr '21 — Apr'23
B.COM in General , University of Madras (GPA: 8.42 / 10)	Nov '18 — Jul '21
Higher Secondary in Commerce with Business Math, Kaligi Montford (GPA: 9.05 / 10)	May '16 — May '17
Secondary School in CBSE, Vivekananda Vidyalaya (GPA: 9.05 / 10)	May '14 — May '15
Prepared for SSC CGL Exam , Varanda Race Institute	Aug '23 — May '26

EXPERIENCE

Risk Dashboard Developer Intern

Jan '26 — Present

- Remote Zetheta Algorithms Pvt Ltd
 - Worked on quantitative finance projects including Systemic Risk Network, Quantitative Risk Dashboard, Fear-Greed Meter, and Oil Shock Tracing. Designed core modules for risk analytics, market sentiment measurement, and shock propagation analysis, followed by visualization and dashboard integration
- Conducted testing, validation, and documentation to ensure reliability of financial risk indicators and analytical outputs.

Data Science Intern

Dec '25 — Jan '26

Remote EVOASTRA VENTURES PVT LTD

Performed ethical web scraping and data collection to build job-market datasets

- Cleaned, validated, and structured raw data using Python and Pandas
- Conducted EDA to identify hiring trends across roles, skills, and locations.

Data Analyst Intern

Aug '25 — Sep '25

Remote ElevateLabs- (Best Performer)

Completed 8 end-to-end data analytics projects using Excel, SQL, Python, and Power BI

Conducted real-world case study using primary survey data, from questionnaire design to insight reporting

Recognized as Best Performer for analytical quality and consistency.

AWARDS

3rd Place – Shinkansen Hackathon (Passenger Satisfaction Prediction) | Great Learning

Secured Top 3 position in a 2-day Shinkansen Hackathon by building a machine learning model to predict passenger satisfaction using real-world travel data, achieving ~95.6% accuracy.

Research Paper Presentation - Impact of Virtual Influencers in Marketing | Ethiraj College for Women 2nd Place

PROJECTS

AI-Powered RAG Knowledge Assistant

- Developed an end-to-end Retrieval-Augmented Generation (RAG) pipeline using Python, LangChain, FAISS, embeddings, and LLM workflows to enable semantic document retrieval and contextual question answering with improved retrieval relevance through top-k similarity search.

INN Hotels Booking Cancellation Prediction

- Built a classification model using feature engineering, VIF-based selection, and threshold optimization to predict hotel booking cancellations, achieving ROC-AUC ~0.85 and F1-score ~0.70 while identifying revenue-impacting customer behavior patterns.

Industrial ML – Smart Building Energy Optimization

- Developed a time-series anomaly detection pipeline using LSTM autoencoders and ensemble models on multivariate energy and weather datasets to classify abnormal usage patterns and improve operational monitoring for energy optimization.

Water Quality Prediction – EY Hackathon

- Engineered a multi-source ML pipeline integrating Landsat satellite and climate datasets using LightGBM/XGBoost with 5-fold cross-validation, achieving $R^2 \sim 0.82$ through spatial-temporal feature engineering for environmental prediction tasks.

Oil Shock Market Simulation Platform

- Designed a scenario-based market simulation framework using time-series analytics and correlation modeling to analyze oil price shock propagation, volatility shifts, and cross-asset portfolio risk behavior under macroeconomic events.

ShowTime OTT – Viewership Prediction

- Built regression models using OLS, Ridge, and Lasso techniques to predict OTT content viewership, achieving $R^2 \sim 0.78$ while identifying key engagement drivers to support data-driven content strategy optimization.

AI-Powered Smart City Road Safety Intelligence System

- Developing an AI-driven smart-city intelligence platform using machine learning, anomaly detection, governance analytics, and predictive risk modeling to support emergency accessibility monitoring and urban traffic safety workflows.

Quantitative Risk Dashboard & Market Intelligence Platform

- Developed analytics modules for systemic risk analysis, market sentiment tracking, and oil shock tracing using quantitative finance models and visualization workflows to support real-time financial risk monitoring and decision intelligence.

Multi-Agent Customer Support Assistant

Technologies: Python, LangChain, LLMs, AI Agents

- Developed a multi-agent AI assistant using orchestrator-based workflows with intent detection, response generation, and escalation logic for enterprise support automation.
- Implemented agent coordination and task routing workflows to simulate autonomous reasoning and contextual decision-making.
- Designed modular conversational pipelines for query handling, response validation, and workflow automation using LLM-based reasoning systems.
